(a) Includes Free Homestead Farms and Reserves. \* Revised.

## VII—PRODUCTION

### No. 31—Estimated Net Value of Western Australian Production

For Primary Industries, net value of production is derived by deducting all marketing costs and the value of goods used in production (seed, fertilizer, pickling, sprays, dips, fodder, fuel and oil, etc.) from the value realized "at the principal market." For Manufacturing, it is obtained by deducting the value of goods consumed in the process of production (i.e., materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced and containers and packings) from the selling value "at the factory door."

Year	Agricultural	Pastoral and Trapping (a)	Dairy, Poultry and Bee Farming	Forestry and Fisheries	Mining and Quarrying	Total Primary	Manufacturing
1950-51	£33,125,536	£61,711,921	£3,886,926	£3,547,464	£8,751,056	£11,022,903	£34,220,384

§ Annual Declaration. (a) Defined for basic wage purposes as the area comprised within a radius of 15 miles from G.P.O., Perth. (b) As defined in the Land Act but excluding the Metropolitan Area. (c) Rates for divisions shown not specifically declared by Court. (See letterpress in June, 1942, issue.) (d) Relates to certain specified Goldfields Districts only. (e) Rates declared in Basic Wage Adjustment and Order No. 1 issued under the authority of National Security (Economic Organization) Regulations. (f) Beginning of first pay period. (g) Beginning of next succeeding pay period. (h) Interim Basic Wage declaration authorized under amendment to National Security (Economic Organization) Regulations, operative first pay period after date thereof. (i) Special determination incorporating increase of £1 for males and 15s. for females. (j) Female rate increased to 65 per cent. of male rate as from 1st December, 1951. (k) Female rate increased to 75 per cent. of male rate from beginning of first pay period commencing on or after this date.

No. 46—Minimum Rates of Wages payable to Adult Workers under Awards of Arbitration Authorities  
and Industrial Agreements, as at 30th September, 1961

Rates relate to the Metropolitan Area except where otherwise stated, and are shown to the nearest farthing

## XIV—METEOROLOGICAL STATISTICS

(Supplied by courtesy of the Deputy Director, Meteorological Services)

**No. 48—Notes on the Rainfall and General Weather Conditions in Western Australia during July, August and September, 1961**

---

### **July**

*General*.—There was a normal movement of pressure systems across the State in July and rainfall was fairly evenly distributed throughout the month. However, depressions varied in intensity and on three occasions strong to gale force winds were experienced, especially in the south-west, with rough to very rough seas on the coast.

Heavy gales occurred over the southern areas between the 26th and the 29th. In Bunbury and adjacent areas tornadic squalls demolished buildings, uprooted trees, and disrupted power, telephone and road transport services.

Unprecedented cold was associated with a deep southerly stream at the rear of the second depression. This was in marked contrast to the warm conditions experienced a week to ten days earlier when because of tropical influences, very high maxima and minima were reported over large areas.

*Rainfall*.—Except for a few points in the Fortescue, no rain was reported from the tropics during July. Elsewhere most areas received falls below normal although, in the south-west and south coastal areas and agricultural districts, deviations from normal were slight and falls, spread at fairly regular intervals, were most beneficial.

Above-normal falls were confined mainly to the south-west, south coastal, and central south areas, and the eastern wheat belt from Southern Cross eastward and south to Norseman.

Once more the major parts of the Gascoyne, the northern goldfields and the North-Eastern and Eucla divisions received little rain.

*Temperature*.—Maximum temperatures during the month were above normal in the North Kimberley division and over most of the State south of the tropics, with the exception of the Gascoyne division, the South-Eastern and the North Coastal districts. The East Gascoyne in common with most southern areas, was above normal early in the month but was affected by the cold wave which swept the State in the third week. The South-Eastern division was similarly affected, and Kalgoorlie aerodrome on the 19th experienced the coldest July day on record with a maximum of 45·0°. Further south Esperance had above normal temperatures.

Minima were below normal in all divisions except the East Kimberley and along the far south coast while in the West Gascoyne high minima, 8°–10° above normal, were experienced in the second week.

The cold snap in the third week penetrated well into the tropics and was responsible for frosts as far north as the De Grey division where Marble Bar recorded 36·0° on the 19th, the lowest night temperature on record for July. Record low minima were reported also from stations in the East Gascoyne and northern agricultural areas while many places elsewhere in the agricultural areas, the south-west, and the South-Eastern division reported minimum temperatures which at times were 8°–10° below the July normal.

*Metropolitan*.—Rainfall during July was above average over most of the metropolitan area and at Perth 747 points fell on 17 days, exceeding the month's normal by 60 points. The total rainfall during the first seven months of the year was 2249 points, three points more than normal for the period.

Winds reached high velocities on several occasions, the maximum being 69 m.p.h. from the west during the early morning of the 1st. Velocities exceeding 50 m.p.h. were recorded on a number of days and 60 m.p.h. on several occasions towards the end of the month. Little damage was reported as a direct result of wind gusts.

A thunderstorm on the 18th was associated with hail which covered lawns and roadways to a depth of three inches between Cottesloe and Floreat Park while lightning caused a temporary disruption of electrical power at several centres.

The mean maximum temperature at Perth was slightly above normal but the mean minimum was more than a degree below normal. Temperatures ranged from 40·0° on the 25th to 73·3° on the 26th.

## August

*General*—In August depressions passed at regular intervals without complications except in the second week, when a sudden deepening caused increased winds over the south-west region.

The anticyclone which followed this depression brought a cold southerly stream of air, which penetrated well north and reduced maxima several degrees, with frosts as far north as Mundiwindi.

A fitting end to the winter was the arrival of a depression on the 29th which carried excellent rains to parts of the West Gascoyne and through most of the agricultural districts. In the northern and north-eastern wheat belt the resultant falls were very beneficial and indications at the end of the month favoured a continuance of westerly stream weather with further rain south of the tropics.

*Rainfall*—The rains late in August changed the situation entirely in the agricultural areas and places which up to the third week had received falls well below average finished the month with either slight excesses or deficiencies.

The depression on the 29th brought rain to the Gascoyne, particularly in the western region where falls exceeding an inch and up to two inches were received at pastoral properties. Although the totals in the northern, north-eastern and eastern wheat belt were below normal, except at isolated places, the falls relieved anxiety.

South from Narrogin, Kukerin and Pingrup, few stations reached the average but this area had received good rains in earlier months.

The central west and south-west coasts, together with most places in the central wheat areas through to Ravensthorpe and Hopetoun, received above normal falls.

The tropics received no rain and large sections of the Gascoyne, North-Eastern and South-Eastern divisions and northern goldfields, received only light falls.

*Temperature*—With the exception of the East Kimberley and Fortescue divisions maximum temperatures during August were above normal.

In the North Kimberley the normal was exceeded by several degrees but elsewhere excesses were not so marked and were due mainly to conditions which prevailed towards the end of the month.

Minimum temperatures were not so clearly defined. In the North Kimberley although day temperatures were high night readings were well below average and the East Kimberley and Fortescue were the only tropical areas where night readings were above average.

South of the tropics minima were above normal on the coast and in the north-east, frosts, heavy at places, were experienced at most inland localities in the middle of the month, affecting appreciably the monthly mean.

The lowest minimum reported was 29° which occurred at Mundiwindi on the 17th and Warburton Ranges on the 6th.

Towards the end of the month maxima again showed a marked upward trend in all divisions south of the tropics and day temperatures rose 10°–15° above normal at many places.

*Metropolitan*—It was a fairly equable month in the metropolitan area and although night temperatures at Perth were 1° above normal, day temperatures exceeded the average by 0·1° only. The former was due mainly to excessive cloud which reduced the amount of sunshine by eight per cent.

The greatest wind gust was 62 m.p.h. on the 13th from the WSW but the average daily wind run just exceeded the average and the rainfall, 595 points on 15 days, was 38 points above normal.

## September

*General*—Southern influences were active in the early part of the month and fairly frequent waves of southern low pressure with associated fronts passed across the southern parts of the State. These brought light but useful falls of rain to the agricultural areas and moderately cool conditions.

About the middle of the month the pressure pattern changed. Pressure systems assumed a more southerly track, allowing tropical low-pressure troughs to extend southward along the full length of the west coast to exclude almost completely southern low pressure influence. Cool southerly air was replaced by hot dry northerlies over the western half of the State and not only was there an absence of rain but extreme and at places record heat accompanied the formation of each trough.

On the 26th there was a recurrence of southern activity and light rain fell in the agricultural areas with moderate falls on the south-west coast.

*Rainfall*—During the first half of the month light rain penetrated to most of the agricultural areas with heavier falls up to an inch and over in the far south-west of the State.

Between the 12th and 26th of the month however little rain was recorded and that which was reported amounted to little more than a few points at most places with only slightly heavier amounts in the southern areas. A return to southern influence on the 26th brought light falls over most of the south-west division but in the wheat belt brought little benefit. As a consequence the month's totals were generally well below normal apart from a few places in the southern areas. Wheat belt stations were fortunate to receive 25% of the normal expectancy.

*Temperature*—During the early part of September night and day temperatures were below normal. However, about the middle of the month, maxima and minima rose appreciably with the formation of tropical low-pressure troughs on the west coast. With movement of this pressure pattern, the associated heat passed east and north to affect ultimately the whole State. On two occasions day temperatures in the south-west and later the South-Eastern division exceeded the normal by as much as 20° with night readings of 15° above normal. Among these Dwellingup (85°), Eclipse Island (89°), Cape Leeuwin (82°) and Kalgoorlie aerodrome (95°) exceeded previous records for September.

As the warm conditions spread to the tropics several stations recorded temperatures within a degree or so of the September record but, in the main, the heat was sustained rather than extreme. Wyndham registered 8 centuries, Talgarno 7, Turkey Creek 7, Fitzroy Crossing 16, Derby 9, Marble Bar 9, Broome 2, Port Hedland 3, Roebourne 4, and Mardie 5. In the Kimberley division, on only 3 days did the temperature fail to reach 97° at Fitzroy Crossing. Talgarno reported the highest temperature with 105° on two consecutive days.

The lowest minimum was 34° at Wandering on several days and at Norseman on the 13th.

*Metropolitan*—Temperatures both night and day were several degrees above the September normal at Perth and on two occasions the maximum rose close to the highest ever recorded. The temperature of 90° registered on the 22nd was only 0.9° lower than the September record.

Although there were twelve days of rain against a normal of fourteen, the total precipitation was little more than half the average.

## XVI—BUILDING OPERATIONS

### No. 53—New Buildings Completed

The figures in this table cover the operations of all builders who accept contracts for the construction of new buildings, "day labour" building by governmental agencies and the activities of "Owner-Builders." The term "Owner-Built" refers to buildings actually erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

The value of land on which the buildings were erected is not included in the values shown.

 list price (excluding hiring charges and insurance). (c) Excludes hiring charges and insurance. (d) Includes hiring charges and insurance.

## XVIII—MOTOR VEHICLE REGISTRATIONS

In Western Australia there is no single authority responsible for the licensing of vehicles. The Traffic Branch of the Police Department issues licences in the Metropolitan Traffic Area, which comprises the whole of the Metropolitan Statistical Division and that part of the Swan Division consisting of the Shires of Cockburn, Gosnells, Kwinana and Rockingham in their entirety and parts of the Shires of Armadale-Kelmscott, Mundaring and Swan. Outside the Metropolitan Traffic Area the Town or Shire Council is responsible for the licensing of vehicles in its own district.

Total, Census, 30th June, 1954	330,358	309,413	639,771	162,823	6,614	169,437

(a) Preliminary Census figures.

(b) For Census purposes, an occupied "dwelling" is defined as any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term "unoccupied" is not confined to vacant houses and flats available for sale or letting, but includes also "week-end," holiday and other dwellings whose usual occupants were temporarily absent on the night of the Census. Newly-completed dwellings awaiting occupancy are also included.

(c) Persons (both passengers and crew) not enumerated elsewhere who spent Census night on ships, long-distance trains or aircraft.
